

optibelt ALPHA V

Optibelt ALPHA V are timing belts that are manufactured endless from Optibelt ALPHA linear timing belts with a break in the tension cord and that are primarily used in the conveyor technology sector.

Advantages

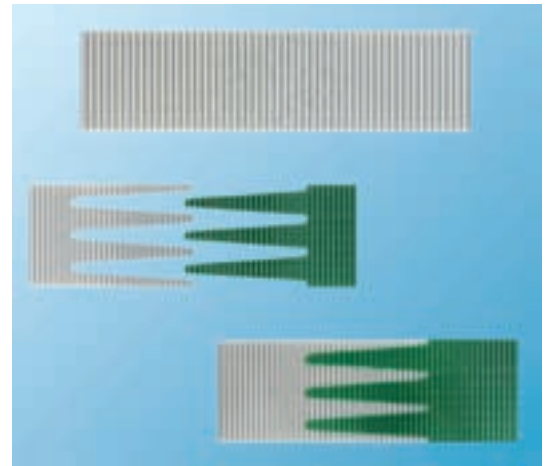

- Every length of pitch stepping can be manufactured endless
- Cost-efficient and can be supplied at short notice
- Large range of choice – even with fabric coating
- Although there is a break in the tension cord, approx. 50% of the performance of the endless manufactured timing belts is achieved
- Ideal for conveyor technology

Designs that can be delivered

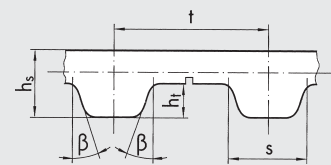

- Mechanically processed
- Cleats and coatings
- Fabric on the teeth and/or belt top surface possible
- Special tension cords:
E-tension cords – highly flexible, aramid, stainless steel – rust-proof
- Can be delivered already dyed

Examples of Applications

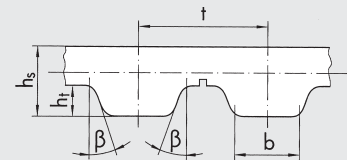

- Belt conveyor systems and transport systems

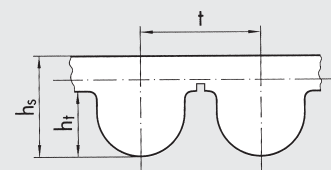

Sections:

L; H; XH; T5; T10; T20
