

optibelt **KB RED POWER II** maintenance-free

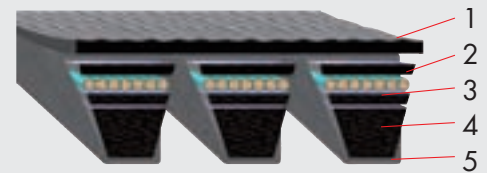

Optibelt KB RED POWER II kraftbands are made up of high quality wrapped Optibelt RED POWER II V-belts which are joined together with one another via a top surface which has a high level of resistance to wear and tear. This compact drive product is preferably used when dealing with extreme impact loads, large centre distances, vertical shafts and clutching drives. The cover fabric which is wear- and tear-resistant, the high-quality rubber compound and the special low stretch polyester cord guarantee a high level of dynamic load and maintenance-free drives. Combinations of sets are required in the event of multiple kraftbands being used per drive.

Optibelt KB RED POWER II Kraftbands are:

- Powerful
- Maintenance-free / low stretch
- Cost-efficient
- Environmentally friendly
- They also have increased power characteristics

Examples of Applications

- | | |
|--------------------------|--------------------------|
| Commercial vehicles | ■ Air conditioning units |
| Machine construction | ■ Compressors |
| Construction machinery | ■ Pumps |
| Paper machines | ■ Pulping machines |
| Plastics machines | ■ Extruders |
| Wood processing machines | ■ High power saws |

- 1 Transverse-positioned fibre compound made from polychloroprene
- 2 Polyester tension cord, maintenance-free
- 3 Transverse-positioned fibre compound made from polychloroprene
- 4 Base compound
- 5 Abrasion-resistant cover fabric

Sections:

3V/9J; 5V/15J; 8V/25J;
SPB; SPC

Dimensions:

1270 to 12 000 mm
standard range

Kraftband pulleys:

all standard pulleys
special pulleys on request
